Written Patient Comments

- - -

"Due to my laziness I would have hoped to have a FemiScan Home Trainer also after the training period ended. Motivation and the gained results tend to disappear after guided training. The Home Trainer voice commands are compact and easy to implement."

- - -

- - -

"Without the FemiScan treatment I would not have gained such good results!"

- - -

- - -

"In my opinion the FemiScan treatment session should be repeated yearly."

- - -

- - -

"In the beginning the training program felt demanding, but after several exercise times it was suitable for me. I am satisfied with the results of the FemiScan treatment."

- - -

- - -

"The FemiScan –treatment period relieved my incontinence problem and encouraged into independent training. However, self-discipline starts to fade without guided treatment and FemiScan. "
